Resins for Mould and Pattern making

Concrete Surface Retarders

DESIGN YOUR CONCRETE

RECKLI WetCast®

RECKLI WetCast® – individual moulds for a perfect concrete surface.

High efficiency combined with individual design; that's what RECKLI WetCast® stands for. RECKLI moulds are manufactured from polyurethane that has been specifically developed for use in wet-casting. Their advantage: the high quality of the polyurethane, dimensional stability and abrasion resistance make RECKLI WetCast® moulds particularly durable. The high elasticity of the moulds also guarantees easy demoulding. There are no limits to creativity. Structures, logos, pictograms, letters and even photos can be immortalised in concrete.

RECKLI WetCast®

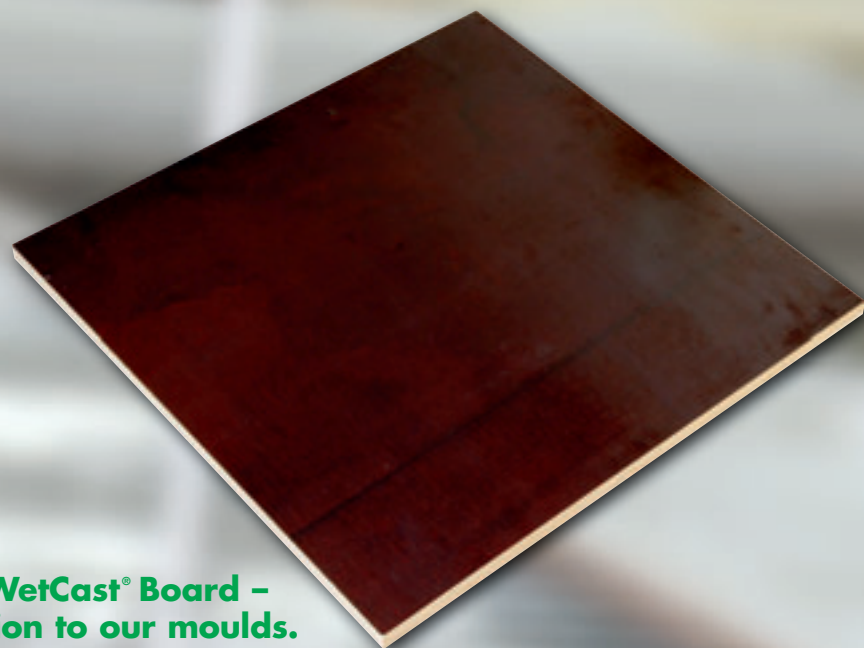

- Tear-resistant polyurethane
- various Shore hardnesses
- high elasticity
- dimensional stability
- abrasion resistant
- durable
- reduced water absorption
- custom-made designs

Your benefits

- high number of re-uses
- reduction of rejects
- easy to demould
- unique moulds – individual designs
- technical on-site service in every region
- RECKLI as a complete provider:
release agent, polyurethane, WetCast Board,
impregnation

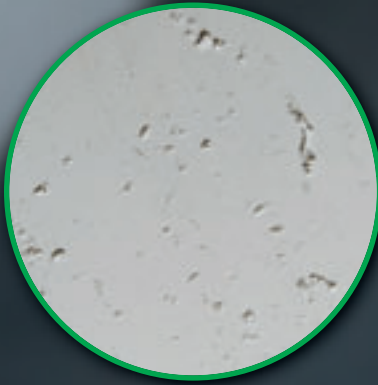

RECKLI modelling

- internal mould-making facility
- qualified mould-makers and modellers
- traditional craftsmanship combined with the latest CNC technology

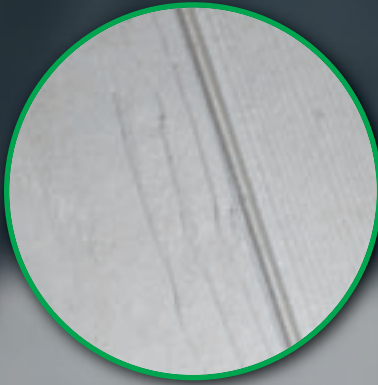

**RECKLI WetCast® Board –
The perfect addition to our moulds.**

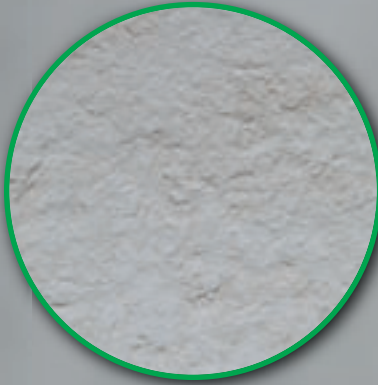

RECKLI WetCast® moulds – Makes any individual design possible.

e.g. RECKLI 2/90 Travertin

e.g. RECKLI 2/82 Colorado

e.g. RECKLI 2/166 Cilento

e.g. Pictogram
